

APPRECIATION LETTER

UNNATI - BATCH 1

15th March 2019

Dr. Kailasavadivoo Sivan
Tumkur Main Road, Vivekanand Nagar, Peenya, Bengaluru
Karnataka 560058, India

Dear Mr. Chairman of the Indian Space Research Organisation,

The participants of the first UNISPACE Nano-satellite Assembly & Training by ISRO (UNNATI), held at the U. R. Rao Satellite Center from January to March 2019, are pleased to thank the Indian Space Research Organisation for the generous hospitality and enriching training program that will allow us to pave the way towards a bright future in global space exploration.

The two months we spent with you showed us the greatness of the Indian people, the richness of your culture and the willingness to share your knowledge. Unity in diversity - the common denominator not only in India but also across the nationalities herewith represented - will keep inspiring us in overtaking mighty challenges, together.

Our deepest gratitude also goes to the amazing caterer and staff of Devanahalli Guest House that made us feel home; to the outstanding engineers and science communicators from whom we absorbed the Indian heritage of satellite technology; and to the decision-makers which had brought this initiative into reality.

Jai Hind,
